MESSAGE

Indiapack'89 has now been institutionalised as a biennial event of considerable significance. I am glad that the Trade Fair Authority of India is organising it for the second time in co-operation with the Indian Institute of Packaging.

The importance of packaging is being increasingly felt not only for preservation and proper distribution but also for improving marketability, easy handling and transport and providing independent brand identification.

The future trends in packaging aim at achieving cost reduction, recycling of packaging materials, energy conservation, pollution, control, etc.

Packaging has assumed greater importance in the field of processed food industry in view of the vast potential for export of processed foods in value added form. The Trade Fair Authority of India has therefore combined Indiapack with AHARA to sharpen the focus on packaging technologies, including problems, prospects, future needs and export capabilities.

I wish the fair all success.

MOHAMMAD YUNUS
CHAIRMAN
Trade Fair Authority of India.

MESSAGE

The packaging industry in India has made an all out effort to upgrade its own technology in view of the revolutionary developments that have taken place in the packaging field world over. This process had not been easy but the liberal policies adopted by the Government of India with regard to import of packaging machinery and materials under the Open General Licence, have contributed immensely towards accelerating the pace of industrial development.

The new emphasis on food processing by establishing a separate ministry and the incentives offered to agro based industries speaks of the government's interest. These developments and the significant increase in value added exports of commodities have directly prompted the spectacular growth of packaging industry in the country.

The second international packaging exhibition promoted by the Indian Institute of Packaging will provide the opportunity to the packaging industry in India to display their innovative developments and possibly open up new avenues of exports. It will also encourage multilateral exchanges for co-operation among different countries for the benefit of not only the Indian industries but those from the neighbouring countries too as experienced after the exhibition organised in 1987.

I wish this event all the success.

T.S. BHAT
CHAIRMAN
Indian Institute of Packaging

BACKGROUND OF
INDIAPACK'89

Packaging Scene in India

The packaging industry in India comprises 10,000 small scale packaging industry units with investment upto US $ 250,000 approx. on machinery and equipment and an estimated 500 units which can be termed to be medium and large, some of them with overseas collaboration and having investment of the order of a few million dollars. Among the packaging materials consumed in the country, timber is used to the tune of over 1.5 million tonnes followed by jute, about 1 million tonnes. The rest of the packaging materials together account for about 2.5 million tonnes with paper at the top of the list, which is about to touch 1 million tonnes.

Package Users

An estimated 500,000 small scale industry units and 10,000 units in the organised industrial sectors of India consume the diverse products of the packaging industry.

Imports of Packaging Items

India has realised the need for upgrading packaging. The Government as a result adopted a liberal Import Policy from April 1985 to March 1988, now extended upto March 1991.

Imports of a wide variety of packaging materials are presently permitted not only to meet the shortfall in production but to offer greater variety in the materials considered useful for the purpose. Most of the packaging raw materials and significant packaging machinery can be

imported freely without the need for an import licence by the users of packaging. This facility is referred to as Open General Licence (OGL). Imports of few packaging materials are canalised through the Agencies of the Government.

A variety of packaging materials and even finished packages can be imported by exporters.

Packaging conversion industrial units, called Actual Users, can import without the need for a licence, a large number of packaging raw materials. Printing and allied machinery can also be imported by them under Open General Licence.

As a result, India today witnesses revolutionary changes in the forms of packaging adopted and considerable interest has been generated in acquiring modern systems of packaging to meet the increasing sophistication in the demand for packaging not only by the industrial users but by the common man in the country.

Future Outlook

The bulk of the packaging consumption so far has tounched only about 20% of the population of the country but the sweeping changes that have been brought about not only in the industrial and fiscal policies of the Government of India but also in the Government's attitudes towards consumer protection are expected to have far reaching influence on packaging of articles of common consumption using modern materials and systems so that the consumer's welfare can be taken care of. If one could imagine that an estimated 500 million tonnes commodities of common consumption are to be packed for distribution to about 640 million people spread over the country, it is possible to comprehend the huge demand for packaging that next decade is likely to witness.

The setting up of a new ministry exclusively for food processing industry by the Central Government is expected to give a big boost to the packaging industry.

It is in these circumstances that the IIP had considered it to synchronise the second international packaging exhibition — INDIAPACK '89 with AHARA '89, the food exhibition. The Institute has continued its association with the nation's authority in the field of exhibitions viz. The Trade Fair Authority of India, in providing to the exhibitors all the facilities at a modest cost and to the visitors the convenience and ease, in the sprawling exhibition complex at New Delhi, which has witnessed many an international fair comparable to the best in the world.

TRADE FAIR AUTHORITY OF INDIA

The Trade Fair Authority of india (TFAI) was set up in 1977 by the Government of India as a nodal agency for organising trade fairs and exhibitions both at home and abroad. It has emerged as the key organisation to project India's progress and achievements in diversified fields of economy, science and technology through organisation of 315 fairs and exhibitions abroad and participating in several commodity fairs all over the world. It has also organised 46 exclusive Indian exhibitions overseas. Various business delegations, too, are invited at the exhibitions organised by the Authority abroad and publicity through local press is arranged for Indian participants. All the exhibitions organised by the TFAI abroad have been highly successful in highlighting India's industrial and export capabilities, generating substantial business for Indian companies and promoting relations with other countries.

At home, the Authority promotes the concept of fair culture by hosting India International Trade Fair every year and also a series of specialised commodity displays at Pragati Maidan which has been developed into a permanent exhibition complex. So far, as many as 72 commodities and international fairs have been at Pragati Maidan. Over 110 trade delegates from as many as 95 countries have visited the international fairs and negotiated deals with their Indian counterparts.

The Authority has been admitted to the Union des Foires International (UFI), the world organisation for international fairs and exhibitions.

INDIAN INSTITUTE OF PACKAGING

The IIP was set up as a national Institute jointly by the Ministry of Commerce, Government of India and the Indian Packaging industry and allied interests in 1966 with its Head Quarters and principal laboratories in Bombay.

The Institute's endeavour is to improve the standards of packaging needed for promotion of exports, conservation of resources, prevention of losses and damages to the products distributed in the domestic and export markets and help achieving overall packaging improvement in India through research and development, problem solving consultancy, training and education, testing, information dissemination and other promotional efforts.

The Institute has set up regional centres at Calcutta, Madras and New Delhi.

The Indiapack exhibitions it organises, are national packaging exhibitions. They were held in 1972, 1979, 1983 1985 and 1987.

Services offered by the Institute are:

Post Graduate Education
Certificate Course
Executive Development Programmes
Unit Based Programmes
Research
Technical Consultancy
Testing & Development
Shelf-Life Studies
Standardisation
Testing Equipment Development
Techno Economic Feasibility Studies
Market Research
Graphic Design
Exhibitions and Awards

Products/Services Offered : Domino are world leaders in the manufacture of Ink Jet Printers. Their codebox, Solo and Macrojet models are used in over 50 countries to overprint variable information (such as production/expiry dates, batch number, prices, etc.) onto products moving along production lines. This non-contact printing process is suitable for almost any surface Metal, Plastic, Glass, Paper - and ideal for irregular or fragile surfaces. Domino printers are used by manufacturers of Foodstuffs, Confectionery, Dairy products and Beverages, as well as the Pharmaceutical Industry. A wide range of models caters for character sizes from 1 - 75 mm high.

Shattering some myths
about packaging material

Can a packaging material be light, flexible, resilient, tough, waterproof, odourless, non-toxic, have excellent cushioning property, have abrasion free surface, have antistatic & fire retardant properties, be very easy to fabricate & can be laminated to any surface?

Yes

PROFEEL expanded polyethylene is indeed such a material. Available in roll, sheet & plank forms in different colours. It can replace any packaging material you are using today for cushioning & impact resistance. So, from now on whenever you think of packaging material, think **PROFEEL**.

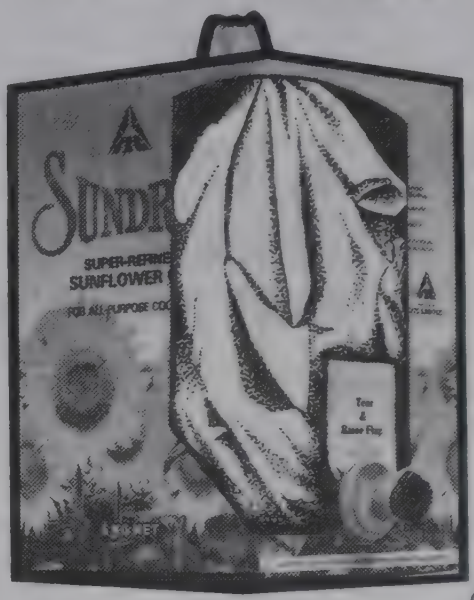
Your products have come a long way... So has our packaging.



Cut-section of the B-I-B System

Now the Bag-in-Box revolution is here!

For over 20 years, ITC-PPD has spearheaded a revolution in packaging. With contemporary technology and numerous product innovations.

ITC now presents the bag-in-box system. Naturally an ITC first.

It is hygenic, tamper-evident, convenient and cost effective. An ideal system for the bulk packaging of edible oil, processed fruit, beverage syrup, wine and dairy products... Yet another landmark from the innovators in packaging.

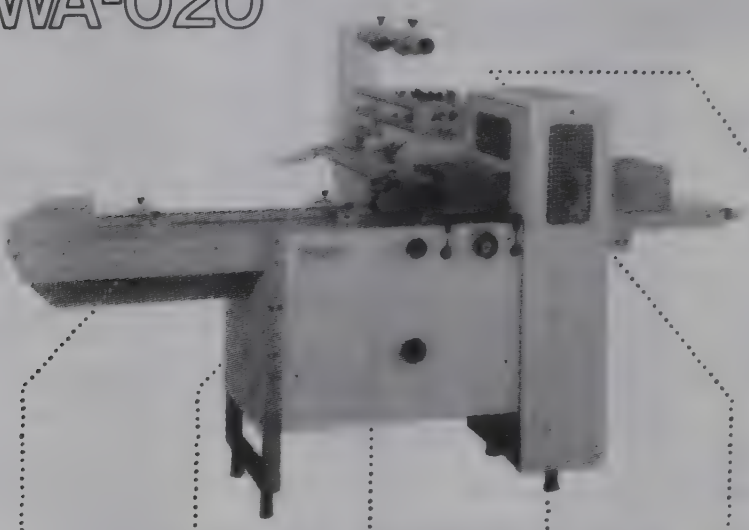
FMC

Horizontal Wrapping Machines

WA-020



A small machine to discover big performances. This is proposed by **FMC** with its recent model **WA - 020** available in various versions. Machine to run with polypropylene, in stainless steel execution, available in version with automatic pitch adjustment variator, with optic-fibres photo cell, with pre-arrangement for the application of a printing unit or other units also. All this joined to solidity, speed, functionality, versatility, etc. makes of the **WA - 020** a small, big wrapping machine.

Maximise your profits in plastics processing

BRIM-ming with confidence ...
BRIM-ming with profits

BRIMCO'S confidence in providing high-quality machines is the result of over 30 years of experience in the field of extrusion.

Besides this, the other reasons are:

We are the best in the trade (it's what out customers say).

We are always the first to introduce new extrusion technology.

We are leading in the widest range of co-extrusion plants.

Our export market is wide, and ever expanding.

Our after-sales service is something one would envy.

Planning to commissioning

What's more, at BRIMCO we not only build extrusion machines but also design, plan and commission complete production plants with all the equipment and allied machinery which allow an enterprise of your calibre to work efficiently and economically – all based on your rigid specifications.

OUR B-R-E-A-D-T-H TAKING RANGE

Extruders and Equipment for

* Lay-flat tubular film from LDPE/HDPE/PVC/PP/ HMHDPE/LLDPE.
* Multilayer films with 2/3/5 layer suitable for variety of applications like Milk/Ghee/Vanaspati packing.
* Wire/Cable coating.
* Lamination plant.
* Monofilament yarn/Box strapping
* Rafia tape and Circular looms.
* Rigid and flexible Pipes/Tubes/ Refills/Straw.

Think Gravure Think Kohli

When you think of fine printing you should be thinking gravure. Traditionally, the superior quality of Rotogravure has been the hallmark of the finest printing, now you can provide this kind of quality in a proven, cost effective package printing system that will meet your customer's most stringent requirements.

When you are thinking of gravure, you must think of Kohli Industries. More than just the finest Rotogravure Press Manufacturer, we are also the acknowledged leader in web converting equipment.

Dedicated to continually advancing the art of gravure printing and web converting, Kohli Industries is developing today what the printing industry will need tomorrow.

This dedication combined with creative engineering uncompromising quality, proven parts supply and reliable service, offers the printer more than a printing press... it offers a total gravure system.

When you think of quality, think gravure. When you think of gravure, think Kohli.

GARGI

The Future Development of Packaging Machinery

For the first time in India a highly reliable Precision Platen Punching Press has been developed, based on a German design and is now with new improved technology, under production at Gargi's uptodate plant in Bhandup Bombay.
The special features of this unique machine are:
Double Sided Helical Gear.
Drive Electro Magnetic Clutch & Brake. The Delayed Dwell System. Centralise Lubrication.
These Specifications are introduced for the first time in India a pioneering feat.

No wonder We are No.1...

Supreme unpacks an exciting range of plastic packaging material at Indiapack '89

Supreme, are the people who understand all the finer points of packaging. Inside out. As pioneers in plastics and innovative packaging in India, Supreme have never stopped introducing newer and better ways of packaging.

And at Indiapack '89 Supreme exhibits some of its unique range of products:

- **Storage and Material Handling Crates**
- **Mono-Co-Extruded and Multilayer Film (upto 5 layers)**
- **Multi Layer sheets (upto 3 layers)**
- **Expanded Polyethylene Foam**
- **Cross Laminated film**

So whether you're in the business of selling ghee or electronics, poultry or engineering goods, animal feed or pharmaceuticals, fruits or air conditioners, or any other kind of product that needs thermoplastic packaging protection — Supreme has the answer.

Visit us at Indiapack '89.

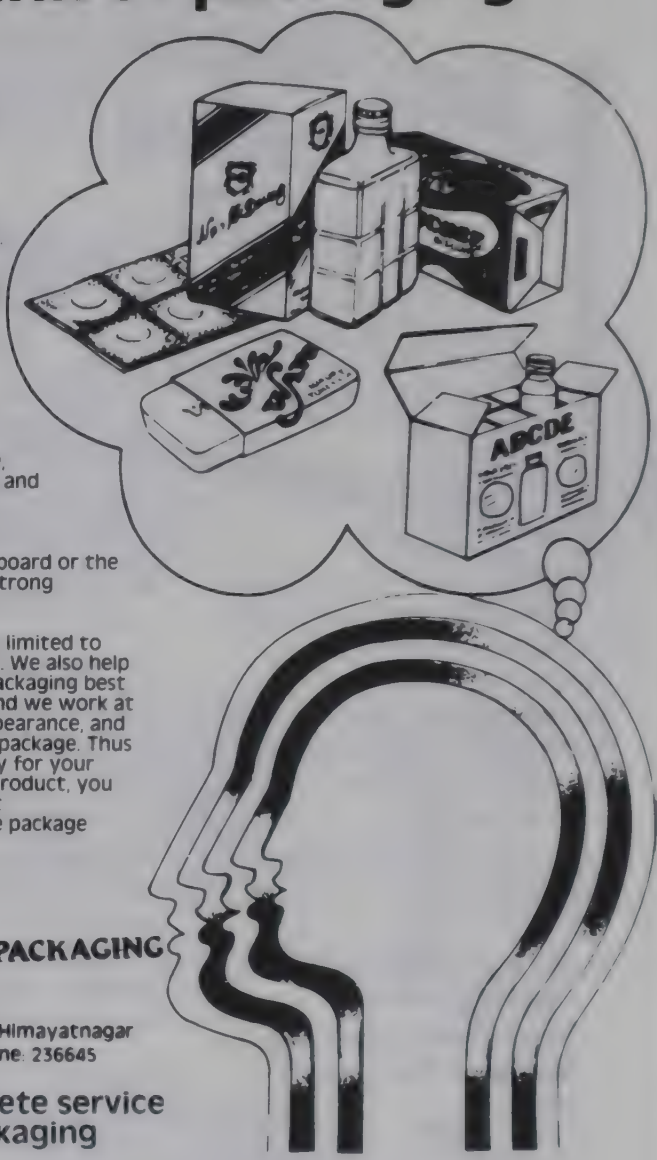
Great marketing minds think alike....

They think of packaging from CIPCO



The package is the silent and final spokesman for your product on the shelf. At CIPCO we make your product present a strong case. We've got packaging to suit a vast range of products from bread to tablets and needles to refrigerators.

We have packaging in Polylaminated Glassine, Aluminium foil, Cellophane, BOPP/Polyester laminates and a combination of these. With or without printing you can choose from folding cartons in Duplex board or the new 'E' fluted board and strong sturdy corrugated boxes.

Our services are in no way limited to providing packaging alone. We also help to identify and develop packaging best suited to your product. And we work at creating an attractive appearance, and top class quality for your package. Thus creating a distinct identity for your product. Whatever your product, you can be sure CIPCO will put working point of purchase package to work for you.

Mfrs of

ASEPTIC BAG & PACKAGING SYSTEMS

for High & Low acid products
AND BAG IN BOX SYSTEMS FOR POWDERS, GRANULES, OILS, DAIRY PRODUCTS ETC.

THE MULTISTARRER IS HERE

WE BRING YOU THE STARS FROM THE WORLD OF PACKAGING

LOHIA SALES & SERVICES PVT. LTD.— the Company committed to excellence in packaging. The key to lasting profits is meeting increasingly exacting demands for packaging materials and systems that represent the most modern in both concept and equipment. In this everchanging world of packaging innovation, flexibility & productivity are the minimum needs.

We at LOHIA understand. We bring you excellence of the international star performers & the pioneers. This means for you not just machinery but technologies, knowledge resource, performance, reliability of highest order and most of all profits!

Windmoeller & Hoelscher, W. Germany the synonym for flexible packaging. A single source supplier for a wide range of equipment & also tailormade production lines.

- Mono & Multilayer blown & cast film lines.
- Extrusion Coating lines
- Wet and solvent free Lamination Equipment
- Printing Presses—Gravure/Flexo
- Machines for pouch, bag & sack manufacture
- Form fill & Seal Machines for heavy duty

Krupp Bellaplast Maschinenbau, W. Germany the world leaders in-line thermoforming lines and profile extrusion.

Holweg International, France— for Rotogravure Printing Machines upto 1000 mm print width, special assemblies for wall paper printing tail end printers both flexo & gravure and coating, waxing lacquering, varnishing machines.

Involvo AG Switzerland Swiss precision in machines for tray pack and wrap around, for excellent visual appeal an aid to product promotion.

Sherman Treaters, U.K. the technologists par excellence in Corona treatment Units, for excellent printability and good ink adhesion.

LOHIA Starlinger Ltd., for other machinery needs for Poly/Jute woven sacks, Tape Production lines, Extrusion Coating, Lamination Lines, Circular Weaving Machines

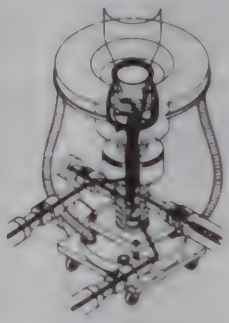
Freshness

Selling freshness has become a little easier:

Interesting for the packaging industry These films can be used without problems for standard film packaging machines



Coextruded multilayer films produced on Barmag blown-film lines combine the characteristics which are of equal importance for the supplier and the customer with regard to "freshness"

- transparancy for appearance and quality testing,
- gas and water tightness against loss of aroma and weight,
- good storing properties of the freshly packaged food,
- easy printing of product information,
- good weldability,
- high tenacity for safe transportation

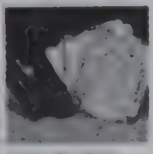
The properties of coextruded multilayer film are exactly tailored to the requirements of the customers by using appropriate materials

Many years of experience, high precision electronic control and regulation permit production of packaging film with reproducable parameters on Barmag blown-film lines

With multilayer film wine and juices keep their taste even after partial emptying of the container

In multilayer film disposable syringes remain over a long time aseptically packed without influence from the material

What a vacuum packing good for when the film bags are damaged during transport? Therefore multilayer film!



Multilayer films eliminate loss of weight and are absolutely neutral in taste

The extruder arrangement depends on the number of film layers required from two-layer film from two extruders to five-layer film from five extruders.

By replacing the extrusion dies, polyolefines with gas-tight polymers, such as PA 6 or EVOH can be coextruded to five-layer films of different width and thickness

WHY DO

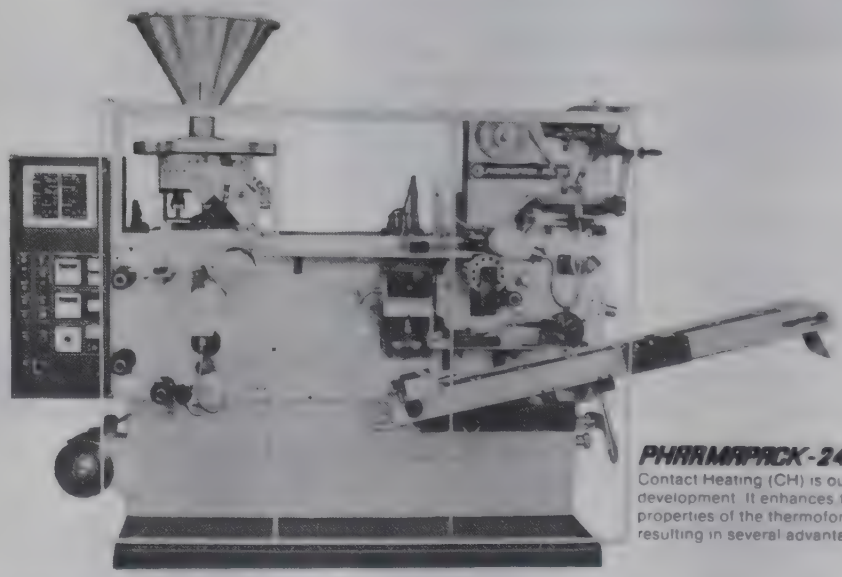
REPUTED NATIONAL AND MULTINATIONAL PHARMACEUTICAL COMPANIES PIN THEIR FAITH ON

PHARMAPACK

BLISTERPACKING MACHINES

BECAUSE

- PRECISION GEARS have the distinction of having pioneered fully automatic blisterpacking machines for the Pharmaceutical industry with dramatic results. Ten years ago PHARMAPACK blisterpacking machines revolutionised pharmaceutical packaging in terms of compactness, hygiene, convenience, speed and economy
- Today, over 150 PHARMAPACK Blisterpacking Machines sold in India and abroad have proved their engineering excellence through consistent performance
- PHARMAPACK design features are constantly reviewed and updated to GMP standards, by our exclusive Research & Development Cell. Computerised data processing and retrieval systems ensure accuracy in updating procedures.
- PHARMAPACK engineers have wide experience in blisterpacking technology. Their extensive knowledge can find imaginative solutions to your specific problems
- Option of 4 excellent models with different machine capabilities and investment returns, makes PHARMAPACK, the unmatched leader in blisterpacking systems



PHARMAPACK-240 CH
Contact Heating (CH) is our latest development. It enhances the barrier properties of the thermoformable film resulting in several advantages

PHARMAPACK-150 CH	COMPACT, LOW INVESTMENT, IDEAL FOR SMALL UNITS
PHARMAPACK-240 CH	HIGH SPEED, CONTINUOUS MOTION, VERSATILE
PHARMAPACK-300 N	EXCLUSIVE DESIGN FOR BLISTERPACKING OF DISPOSABLE INJECTION NEEDLES
FORMPACK-200 A	WIDE APPLICATION, COMPRESSED AIR FORMING, IDEAL FOR INJECTABLES

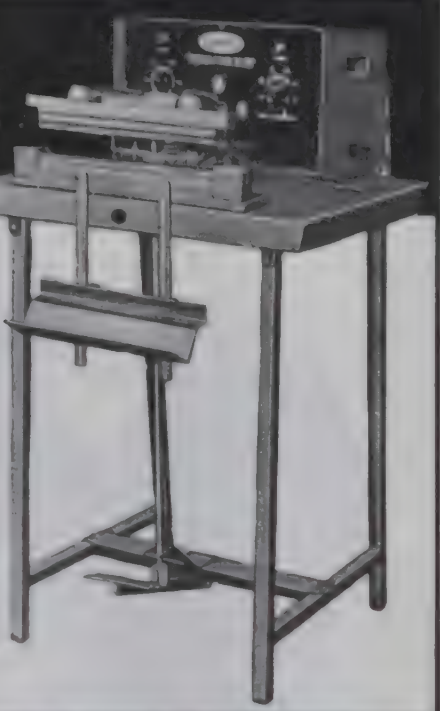
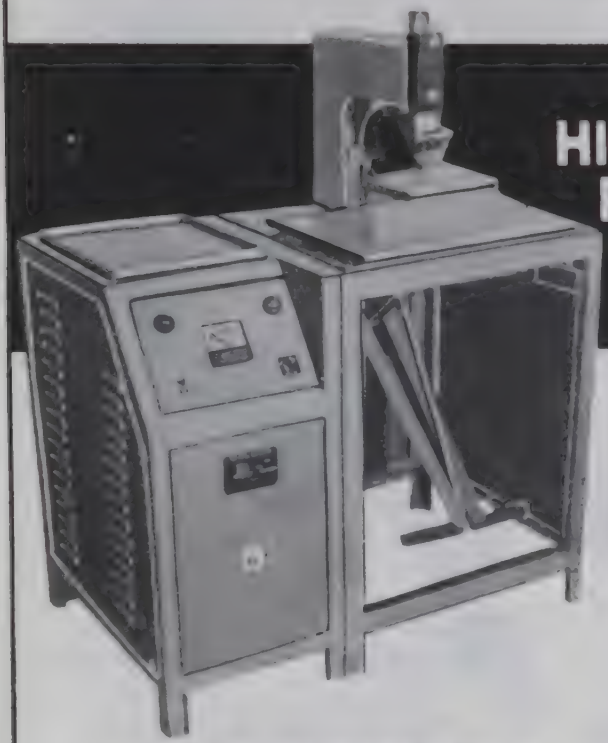
RANGE OF POLYTHENE SEALING MACHINES



The machines are available in sealing lengths from 22.5 c.m. (10") to 1600mm (64") for sealing LD, HD, Polythene films, sheets, and Polycoated Aluminium Paper Pouches. They can also seal Polypropylene and other Thermoplastic Single and Multilayer Films/Laminates/Collapsible Tubes. The machines are available in hand/foot and Pneumatic operation models. Special purpose machines for Contour Sealing, Disposable Glove making, Pouch making & Bottle Cap Sealing are available.



WELDON HIGH FREQUENCY P.V.C. PLASTIC WELDING MACHINES

for packaging in P.V.C. Sheets & Films.
Products all ready packed.
- Pharmaceuticals & Powders
- Glucose and normal Saline
- Shampoos • Hair Oils
- Cosmetics • Tooth Brushes
- Sarees • Covers.

The list goes on and on.
